PROJECTS

Vote Sahay App

- The primary objective of the Vote Sahay app is to provide field-level officials who are directly involved in conducting polls with easy access to important contact numbers of key persons. This includes individuals who play crucial roles in the election process, such as election officers, polling station staff, security personnel, and other stakeholders.
- The application is designed to streamline the communication process by allowing users to quickly access and dial these important contacts directly from the app. This feature is especially useful in situations where immediate communication is required to address issues or resolve challenges that may arise during the election process.
- By providing a centralized platform for accessing key contact information, Vote Sahay aims to enhance the efficiency and effectiveness of election operations, ultimately contributing to the smooth and successful conduct of the Lokesobha Election 2024.
- This app Technology uses android studio and sqlite.Program languages uses backend java and frontend UI Design xml .Database uses Sqlite.Testing for Database connectivity uses in debug and show in Data of my project.
